SUMMARY

Junior frontend developer and former high school physics teacher (6 years) who completed Hack Reactor's full-stack bootcamp in December 2025. Six years of explaining hard concepts to teenagers means I learn fast, document as I go, and care about whether the person on the other end actually understands. Looking for a junior frontend role on a team that hires bootcamp grads and pairs them with senior engineers.

EXPERIENCE

Freelance Web Developer - Self-employed

January 2026 - Present · *Minneapolis, MN*

- Built and shipped two Next.js + Tailwind marketing sites for local small businesses (a dog daycare and a yoga studio), deployed on Vercel.
- Owned the full engagement for both projects: discovery, design feedback loop, build, deploy, and post-launch support.
- Yoga studio reported a qualitative increase in trial bookings after launch.

Physics Teacher - Roosevelt High School

August 2019 - June 2025 · *Minneapolis, MN*

- Taught AP Physics 1, AP Physics C, and intro physics to ~120 students per year.
 - Wrote a Google Apps Script gradebook macro that automated progress reports; adopted by 4 other teachers in the science department.
 - Built and maintained a class website (HTML/CSS) hosted on the school's WordPress for assignments and notes.
 - Coached the FIRST Tech Challenge robotics club for 3 years; team reached regionals twice.
 - Left teaching voluntarily in June 2025 to pursue software engineering full-time.
-

PROJECTS

StudyLoop - Bootcamp capstone (team of 4)

React, Node, PostgreSQL, deployed on Render

- Owned the spaced-repetition algorithm implementation and the deck-import feature.
- Coordinated with three other engineers on API contracts and component boundaries.

WeatherWear - Solo project

React, public weather API

- First solo React project; ~600 lines of code. Suggests outfits based on current conditions.

Open source - Markdown editor

- Merged PR fixing a 12-line bug in the date-parsing utility.

SKILLS

Comfortable: HTML, CSS, JavaScript (ES6+), React (functional components + hooks), Tailwind, Git

Working knowledge: Node, Express, PostgreSQL, REST API design, Next.js

Learning: TypeScript, Jest, AWS deployment

EDUCATION

Hack Reactor (Galvanize) - Full Stack Bootcamp

August 2025 - December 2025 · 16-week immersive · HTML/CSS, JavaScript, React, Node, Express, PostgreSQL, AWS

BS Physics, Minor in Math - University of Minnesota Twin Cities

2019 · GPA 3.4

Minnesota Tier 3 secondary science teaching license

Active through 2027
